COMPANY PROFILE

FROSIO BORTOLO

SINCE 1952

Proprietaria del marchio Forme è la società Frosio Bortolo Srl, una realtà industriale che da oltre 60 anni, produce e commercializza articoli di maniglieria. L'azienda è ancora oggi gestita dalla famiglia Frosio, con la stessa passione e dedizione al lavoro che ne caratterizzarono i natali oltre 60 anni fa ad opera del capostipite Bortolo. Oggi la Frosio Bortolo Srl può vantare la proprietà di diversi marchi, di cui cura direttamente la produzione e la vendita in tutto il mondo. La realizzazione dei prodotti, avviene presso moderni stabilimenti industriali siti nel comune di Preseglie, in Valle Sabbia, una delle zone industrialmente più dinamiche dell'intera provincia bresciana.

Owner of the "Forme" trademark is Frosio Bortolo Srl, an industrial reality that since over 60 years, manufactures and markets articles for handles. The Company is still managed by the Family Frosio, with the same passion and dedication to the job that characterized the birth over 60 years ago by the founder Bortolo. Today Frosio Bortolo Srl can boast the properties of different brands, looking after personally the production and sales in all over the world. The realization of the products takes place in modern industrial establishments in the city of Preseglie, in Valle Sabbia, one of the most dynamic industrial area of the whole province of Brescia.

COMPANY PROFILE

forme®

entirely made in Italy

MANIGLIE MADE IN ITALY DI QUALITÀ DA OLTRE 60 ANNI

forme® è il marchio della società Frosio Bortolo che dona a prodotti apparentemente semplici, come possono essere le maniglie, caratteristiche uniche di Modernità, Eleganza, Qualità ed Eco-sostenibilità. L'esperienza accumulata in oltre 60 anni di lavoro dalla Frosio Bortolo, una realtà interamente Made in Italy, unita, al talento creativo di designers di altissimo livello e all'impegno di ingegneri sempre attenti alla sostenibilità ecologica dei suoi prodotti, ha dato vita a questo prestigioso marchio, che è diventato in pochi anni un punto di riferimento per i prodotti di maniglieria, nonché un sinonimo di qualità garantita.

HANDLES OF QUALITY MADE IN ITALY SINCE OVER 60 YEARS

forme® is the trademark of Company Frosio Bortolo, that gives to a seemingly simple products, such as may be the handles, unique features of modernity, elegance, quality and Eco-sustainability. The experience gained in over 60 years of work by Frosio Bortolo, a reality entirely Made in Italy, joined to creative talent of high-level engineers always attentive to the ecological sustainability of its products, has given life to this prestigious brand, which has become in a few years a point of reference for products of handles, as well as a synonym of guaranteed quality.

FROSIO BORTOLO

*Maniglie dallo spasulì ai robot,
un'esperienza industriale.*

1952

Bortolo Frosio, con la lungimiranza e il coraggio che apparteneva agli italiani del dopoguerra, avvia l'attività di pulitura delle maniglie. E' contoterzista per le aziende produttrici della Val Sabbia e Val Trompia, territori conosciuti fin dal tempo dei romani. La sua straordinaria capacità manuale è già testimoniata dal piccolo aereo in alluminio che il giovane Bortolo, all'età di vent'anni, in un campo di prigionia, costruisce utilizzando i resti di un'elica d'aereo. Nel 1940 a 19 anni, nonostante orfano e primo di sei fratelli, infatti era stato chiamato a combattere. A Casablanca è fatto prigioniero dagli inglesi che lo deportano in California, a San Francisco. Nel mese di settembre del 1946, dopo un viaggio durato sei mesi a causa dei ripetuti sabotaggi della nave, rientra in Italia.

Frosio Bortolo, with the foresight and the courage that belonged to Italians postwar, starts the cleanup task of the handles. He is contractor for manufacturers in Val Sabbia and Val Trompia, territories known since Roman times. His extraordinary manual ability is already evidenced by small aircraft in aluminum that the young Bortolo, at the age of twenty, in a prison camp, built using the remains of a propeller plane. In 1940 at age 19, although orphan and first of six brothers, he had been called to fight. In Casablanca he was captured by the British Army and deported in California, in San Francisco. In September of 1946, after a journey that lasted six months because of repeated acts of sabotage of the ship, returned to Italy.

1960

La costruzione del primo capannone permette di migliorare la specializzazione della fase di lavoro di finitura superficiale delle maniglie prodotte dalle aziende valsabbine. Bortolo intuisce la potenzialità della propria impresa. E' reso ancora più fiducioso nel futuro, dall'ingresso del giovanissimo figlio Pietro. Affronta, a prezzo di sacrifici e rischi, investimenti che contribuiranno a rafforzare la sua attività. Il processo di crescita è inarrestabile.

The construction of the first building will improve the specialization of the work phase of the surface finishing of the handles manufactured by companies in Val Sabbia, Bortolo realizes the potentiality of his business. He was even more confident in the future, from the entry of the young son Pietro. Faces, with sacrifices and risks, investments that will help to strengthen his activities. The growth process is unstoppable.

1980

Si amplia la gamma di lavorazioni, smerigliatura e pulitura, cui si aggiungono brunitura e verniciatura. Ormai l'azienda è in grado di fornire un servizio completo con grande competenza.

He extends the range of processing, grinding and polishing, plus burnishing and painting. Now the company is able to provide a complete service with great competence.

1981

Bortolo lascia ufficialmente l'attività al figlio Pietro, che coinvolge la moglie, signora Mariarosa, nella società.

Bortolo officially left the business to his son Pietro, who involves his wife, Mrs. Mariarosa, in the society.

1993

E' il tempo di nuovi investimenti. Pietro rinnova l'attrezzatura. Le prime macchine semiautomatiche e l'ampliamento dei reparti costituiscono gli interventi iniziali.

It is time of new investments. Pietro renews the equipment. The first semi-automatic machines and expansion of departments are the initial actions.

1995

Fanno il loro ingresso le avanzatissime isole robotizzate destinate alla smerigliatura e lucidatura. I tempi di lavorazione si riducono. Le maniglie garantiscono elevati e costanti standard qualitativi. Per la verniciatura e il lavaggio si impiegano macchine a ultrasuono.

Made their entrance the highly advanced robotic islands destined for grinding and polishing. The processing times are reduced. The handles ensure high and consistent quality standards. For the painting and washing are used ultrasound machines.

1999

L'ampliamento del fabbricato mette a disposizione altri 2000 metri di superficie coperta. Il ciclo di lavoro è suddiviso in quattro aree razionali, rapide, flessibili. Omar e Marco, giovani motivati e dinamici, portano il proprio contributo nell'evoluzione dell'impresa fondata dal nonno, affrontando una sfida storica.

The expansion of the building makes available another 2000 meters of covered area. The work cycle is divided into four rational, fast, flexible areas. Omar and Marco, motivated and dynamic youngs, give their own contribution in the evolution of the company founded by his grandfather, facing a historic challenge.

2000

In località Pregastine si acquisisce l'area un tempo occupata dalla vecchia ferriera dove, dalla laminazione dei binari delle ferrovie, si ricavava tondino.

In location Pregastine is acquired the area once occupied by the old ironworks factory where, from laminating railroad tracks, one obtained round bar.

2003

Inizia l'edificazione della nuova azienda in Via Ferriera, 1. Qui verranno collocati i recenti macchinari tecnologici che gli spazi, ormai angusti della sede di Gazzane, non possono contenere. Pietro vuole realizzare il suo sogno: un edificio solido e bello che superi i confini della funzionalità per esprimere la ricerca estetica sulla quale si fonda la produzione di maniglie e di accessori. Nella forma e nell'aspetto richiama un castello del quale mostra le sembianze: le pietre angolari in granito, le torri in vetro e pietra, i balconcini a loggia con elementi in ferro perpendicolari alla facciata, le lampade riproduzioni di originali d'epoca. Circondato da un corso d'acqua il cui argine mostra grandi pietre tondeggianti a ricordare il fossato di una fortezza, mantiene un aspetto rustico mitigato dal colore degli intonaci.

Began the building of the new company in Via Ferriera, 1. Here will be placed the recent technological machineries, that the restricted space in Gazzane, can not contain. Pietro wants to realize his dream: a solid and nice building that exceed the boundaries of the functionality to express the aesthetic research on which is based the production of handles and accessories. In the form and appearance recalls a castle which shows the appearance: the cornerstones in granite, towers in glass and stone, balconies with "loggia" and iron elements perpendicular to the facade, the lamps of original period reproductions. Surrounded by a little river whose bank shows large rounded stones to remember the moat of a fortress, maintains a rustic look mitigated by the color of the plaster.

I secolari gelsi, scelti da Pietro in ricordo della sua infanzia lombarda, la cui economia da secoli era alimentata anche dalla bachicoltura, come sentinelle vigilano gli angoli della proprietà. Una cancellata in ferro, sostenuta dalla forza dei pilastri bugnati ingentiliti da sfere in tonalite dell'Adamello, introduce in un'azienda in cui gli investimenti sono stati voluti anche in omaggio agli ospiti, perché tali sono considerati i clienti.

The centuries-old mulberry trees, chosen by Pietro in memory of his Lombard childhood whose economy for centuries was also nourished by the silkworm rearing, as sentinels oversee the corners of the property. An iron gate, supported by the strength of the rusticated pillars gentled by spheres of tonalite of the Adamello mountains, introduces in a company in which investments were also wanted in homage to our guests, as we considered our Customers.

Ha inizio una fase di espansione non più rinviabile. La nuova azienda, fondamentale per affrontare la svolta, rafforza l'apertura ai mercati esteri, incrementa la credibilità, richiama nuovi e prestigiosi clienti. Il cammino della Frosio Bortolo continua con una rinnovata immagine in cui ordine, organizzazione, precisione sono colonne portanti.

La svolta epocale: a Gazzane di Preseglie inizia la ricerca costante di soluzioni tecnologiche e qualitative per progettare e produrre maniglie per porte e accessori d'arredo con i propri marchi. Nascono così due linee: la prima dedicata alle maniglie improntate alla ricerca storica, definita con il marchio CLASS. Creazioni e riproduzioni sapienti ed abili di maniglie storiche e artistiche.

La seconda, invece, con un design decisamente più contemporaneo verrà denominata FORME.

Grazie alla produzione di manufatti di qualità, alle capacità ed all'alta professionalità di tutte le maestranze la Frosio Bortolo riesce a far conoscere in tutto il mondo il made in Italy così diffusamente ammirato.

Begins a period of expansion no longer be postponed. The new company, to address the fundamental turning point, strengthens the opening to foreign markets, increases the credibility, attracts new and prestigious Customers. The path of Frosio Bortolo continues with a new image in which order, organization, accuracy are mainstays.

The epochal turning point: in Gazzane di Preseglie starts the constant search for technological and qualitative solutions to design and produce door handles and furnishing accessories with its own brands.

Born in this way two lines : the first dedicated to the creation and wise reproduction of handles that reflect the continuous historical research, defined with the brand CLASS.

The second one, instead , with a surely more contemporary design , will be called FORME .

Thanks to the production of manufactures of high quality, the capability and professionalism of all workers , Frosio Bortolo is able to make known in all over the world the Made in Italy so widely admired.

2014

Nel 2014, grazie al nuovo showroom articolato in tre settori, i clienti possono meglio conoscere la produzione. Realizzato anche in funzione dell'imminenza di Expo 2015, nella prima sala propone serie di maniglie storiche. Sono pezzi preziosi e unici, risultato della sofisticata ricerca tesa a elaborare manufatti, in particolare per il mondo arabo e russo. Il rigore e la precisione della riproduzione raggiungono virtuosismi che danno prodotti identici agli originali, importanti nelle dimensioni, in finiture color oro, con l'impiego di cristalli puri.

In 2014, thanks to the new showroom organized in three areas, the Customers can better know the production. Realized in function of the imminence of Expo 2015, the first room proposes series of historical handles. They are precious and unique pieces, the result of sophisticated research aimed to develop artifacts, particularly for the Arab and Russian world. The rigor and accuracy of reproduction reach virtuosities giving identical products to the original ones, important in dimensions, in gold finishes, with the use of pure crystals .

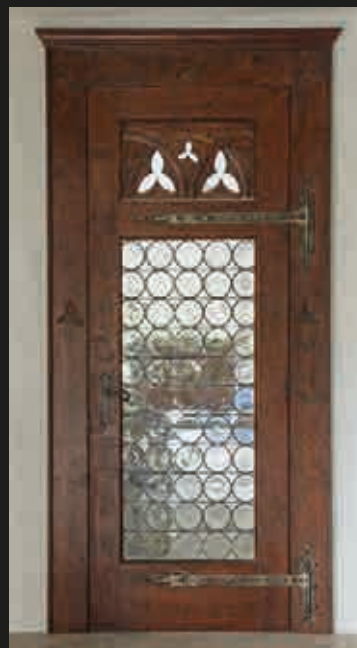

Il design contemporaneo è espresso nella seconda sala: le serie di maniglie in ottone zama, satinato e cromate, presentano uno stile funzionale, talvolta minimalista, per soddisfare l'esigenza dell'abitare, di spazi commerciali, tecnici...

The contemporary design is expressed in the second room: the number of satinated and chromed handles in brass and zama presents a functional style, sometimes minimalist, to satisfy the need of housing, of commercial and technical spaces ...

Sul fondo la sala è arricchita da pareti color oro e nero con pavimenti di marmi a intarsio. Come in uno scrigno, svela le serie complete di accessori per bagni: oggetti preziosi dall'eco storico che fanno sognare. Gli specchi, dalle ricercatissime cornici, richiamano immagini delle corti e dei palazzi dell'Europa di epoca barocca, in cui l'esposizione delle forme è sempre accompagnata da classe e stile. Nella sala dal soffitto ligneo dalle forme variegata che richiamano la scuderia reale di un castello, si realizza l'innovativo progetto di Pietro e dei figli Omar e Marco: la bottega dei cristalli, assemblati sul grande banco, e l'esposizione di storiche porte, progettate e realizzate con il marchio Frosio. Risultato di approfondite ricerche, rappresentano il nuovo obiettivo dell'azienda: offrire ai clienti particolari porte abbinata alle maniglie complete di accessori. E' la sintesi della capacità manifatturiera, della ricerca estetica, del gusto del bello e dello stile propri del Made in Italy.

The end of the room is decorated with gold and black-colored walls and floors with marble inlay. As in a casket, reveals the complete series of accessories for bathrooms: precious objects of historical echo that make dream. The mirrors, the sought-frames, recall images of the courts and palaces of Europe in the Baroque era, in which the exhibition of the forms is always accompanied by class and style. In the room with the wooden ceiling with variegated forms that recall the royal stable of a castle, is realized the innovative project of Pietro and sons Omar and Marco: the workshop of the pure crystals, assembled on the big bank, and the exhibition of historical doors, designed and manufactured under the brand Frosio. Result of detailed researches, represent the new company goal: offer to the customers special doors combined with handles complete with accessories. This is the synthesis of the manufacturing capability, the aesthetic research, the appreciation for beauty and style of the real "Made in Italy".

La storica porta con tondi originali in vetro colorato d'epoca veneziana è un esempio di imprenditorialità finalizzata a offrire porte, serrature, cerniere e maniglie by Frosio.

The historical door with round original colored glasses of the Venetian period is an example of entrepreneurship aimed at providing doors, locks, hinges and handles by Frosio.

Sito Internet

Oltre alla visita nel nostro showroom, è possibile conoscere la vastissima gamma di prodotti dai più comuni, al design, alle lavorazioni di alto livello artistico, sul sito internet www.frosiobortolo.it

La maniglia che cercate non c'è?'

La Frosio Bortolo intende soddisfare qualsiasi richiesta non ancora compresa nella produzione, al fine di acquisire nuovi mercati. Contattateci: fateci conoscere le vostre esigenze. Sarà una nuova e motivante sfida progettare e produrre le maniglie che desiderate.

Orgogliosi e Riconoscenti

Il sogno, il coraggio e l'intelligenza del nonno Bortolo hanno permesso alla nostra famiglia di continuare un'impresa che, superando i sessant'anni, è giunta alla terza generazione. Orgogliosi e riconoscenti, ogni nostro passo orientato al futuro, affonda le sue radici nel passato. E' il passato di un ragazzo di nome Bortolo di Preseglie della Val Sabbia, che a vent'anni si trovò in America, determinato a tornare in Italia per realizzare la sua visione. Ogni passo è stato accompagnato da un'orchestra composta dalle nostre operaie e dai nostri operai, protagonisti insieme a noi nella fatica e nel dovere. Le loro abili e veloci mani hanno prodotto tante maniglie, pezzi, accessori... Nell'orchestra anche impiegati, tecnici, autisti: tutti con lo stesso passo per seguire tempo e ritmo. Tutti per un obiettivo comune: la crescita della Frosio Bortolo e il benessere e la sicurezza delle proprie famiglie. Nell'orchestra ci sono stati avvicendamenti: sono usciti i padri e talvolta sono entrati i figli. Senza il loro impegno non avremmo continuato il cammino perché il primo valore di un'azienda è l'uomo. A tutti la nostra riconoscenza.

I Nostri Valori

Rispetto dell'ambiente, eccellenza, ricerca, innovazione, senso di responsabilità, scelte serie sono tra i valori a fondamento della Frosio Bortolo. A costo di sacrifici e rischi, abbiamo sempre creduto nel dovere di investire nell'azienda come unico mezzo per evolvere e migliorare; come strumento per offrire lavoro al nostro paese e alle sue famiglie. Pietro non ha mai dimenticato le parole pronunciate un giorno dal padre Bortolo, ormai avanti negli anni, che osservando le fatiche e le scelte del figlio, disse: «Stai attento con tutti questi investimenti. Sii prudente, Pietro». «Con te vicino, papà, io non ho paura di niente».

Web site

In addition to visiting our showroom, it is possible to know the wide range of products from the most common to the design and manufacturing of high artistic level, on the website www.frosiobortolo.it

There isn't the handle you are looking for?

La Frosio Bortolo intende soddisfare qualsiasi richiesta non ancora compresa nella produzione, al fine di acquisire nuovi mercati. Contattateci: fateci conoscere le vostre esigenze. Sarà una nuova e motivante sfida progettare e produrre le maniglie che desiderate.

Proud and Grateful

The dream, the courage and intelligence of the grandfather Bortolo have allowed our family to continue an enterprise that, exceeding sixty years, it reached the third generation. Proud and grateful, each step forward-looking, has its roots in the past. It is the past of a boy named Bortolo, born in Preseglie in Valle Sabbia, who at twenty was in America, determined to come back to Italy to realize his vision. Every step has been accompanied by an orchestra composed by our workers, protagonists with us in labor and duty. Their qualified and fast hands have produced many handles, pieces, accessories ... In the orchestra also employees, technicians, drivers: all with the same step to follow time and rhythm. All for a common goal: the growth of Frosio Bortolo company and the welfare and safety of their families. In the orchestra there were alternations: came out fathers and sometimes entered the sons. Without their efforts we would not have continued the path because the first value of a company is the man. To all our gratitude.

Our Values

Respect for the environment, excellence, research, innovation, sense of responsibility, serious choices are among the values at the foundation of the Frosio Bortolo. With sacrifices and risks, we have always believed in duty to invest in the company as the only means to evolve and improve; as a tool to provide jobs to our country and its families. Pietro never forgot the words his father Bortolo said a day, in advanced age, noting the efforts and choices of his son: "Be careful with all these investments. Be prudent, Pietro." "With you so next to me, Dad, I'm not afraid of anything."

Bortolo nel Secolare Olmo

Scolpito nel tronco di un vecchio e grande olmo piantato nel cortile di una casa contadina, Bortolo Frosio, lo *spasuli*, continua imperitabilmente a lucidare maniglie come si faceva a metà del Novecento in Val Sabbia. Gianluigi Zambelli, scultore di Odolo di fama internazionale, per raffigurare il padre del suo amico d'infanzia Pietro, ha sezionato il maestoso albero. All'interno vi ha scoperto un pezzo di reticolato e un gancio di ferro cui si legavano i buoi, oggetti assorbiti nel correre del tempo e inanelati nei cerchi concentrici che rivelano l'età dell'olmo. Realismo e simbolismo si fondono nella figura color miele del legno. La somiglianza fra Bortolo e la statua, il volto concentrato, il movimento delle mani abili, la piega degli abiti da lavoro, la trama intrecciata della sedia, il portafoglio che sporge dalla tasca, esprimono un realismo commovente. Il simbolismo è manifesto nella cinghia che al posto dell'acqua, cadendo, mette in movimento la ruota a pale e la puleggia. Rappresenta l'energia che dall'alto scende sull'uomo chiamato a compiere l'eterna fatica di dominare e convivere con la natura. Il basamento in pietra bianca scalpellata, permette alla statua di ruotare su se stessa quando le mani del figlio Pietro, dei nipoti Omar e Marco e degli operai la sfiorano con un gesto riconoscente e ammirato, quasi a voler comunicare a Bortolo: «Sei sempre qui con noi. Non te ne sei mai andato. Ci accogli tutte le mattine e ci saluti ogni sera quando torniamo a casa, nelle nostre famiglie, dopo aver lavorato qui, nella tua azienda». Come un solido olmo capace di sopportare il gelo nei boschi ombrosi delle valli di montagna, Bortolo il patriarca ha resistito a ogni intemperia con le radici ancorate nella sua valle per proteggere il cammino del figlio e dei nipoti nel mondo.

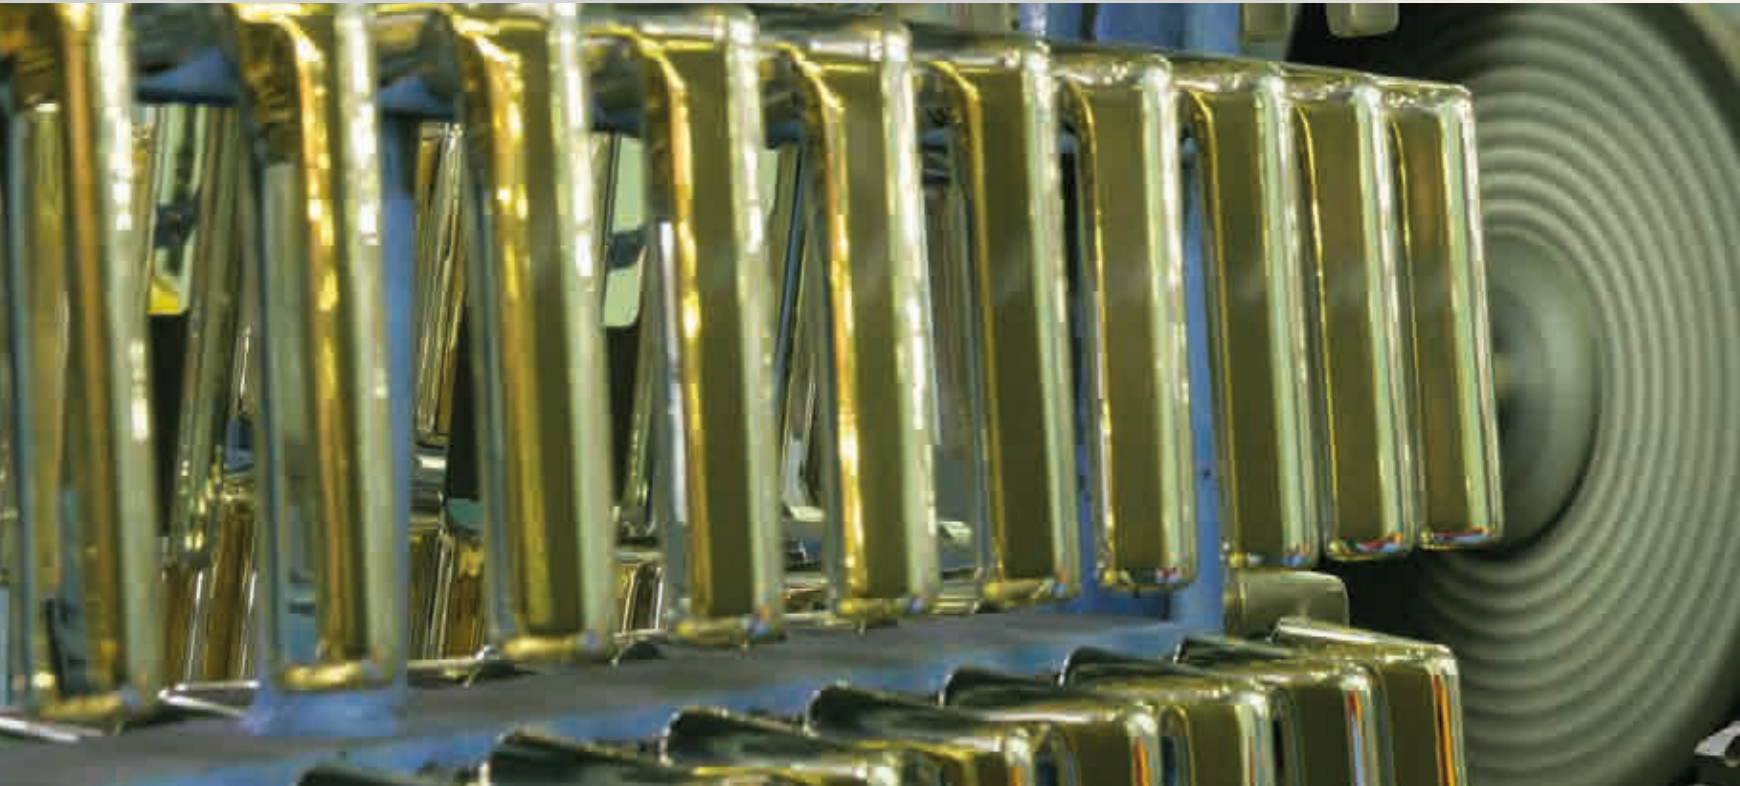

Bortolo in the Secular Elm Tree

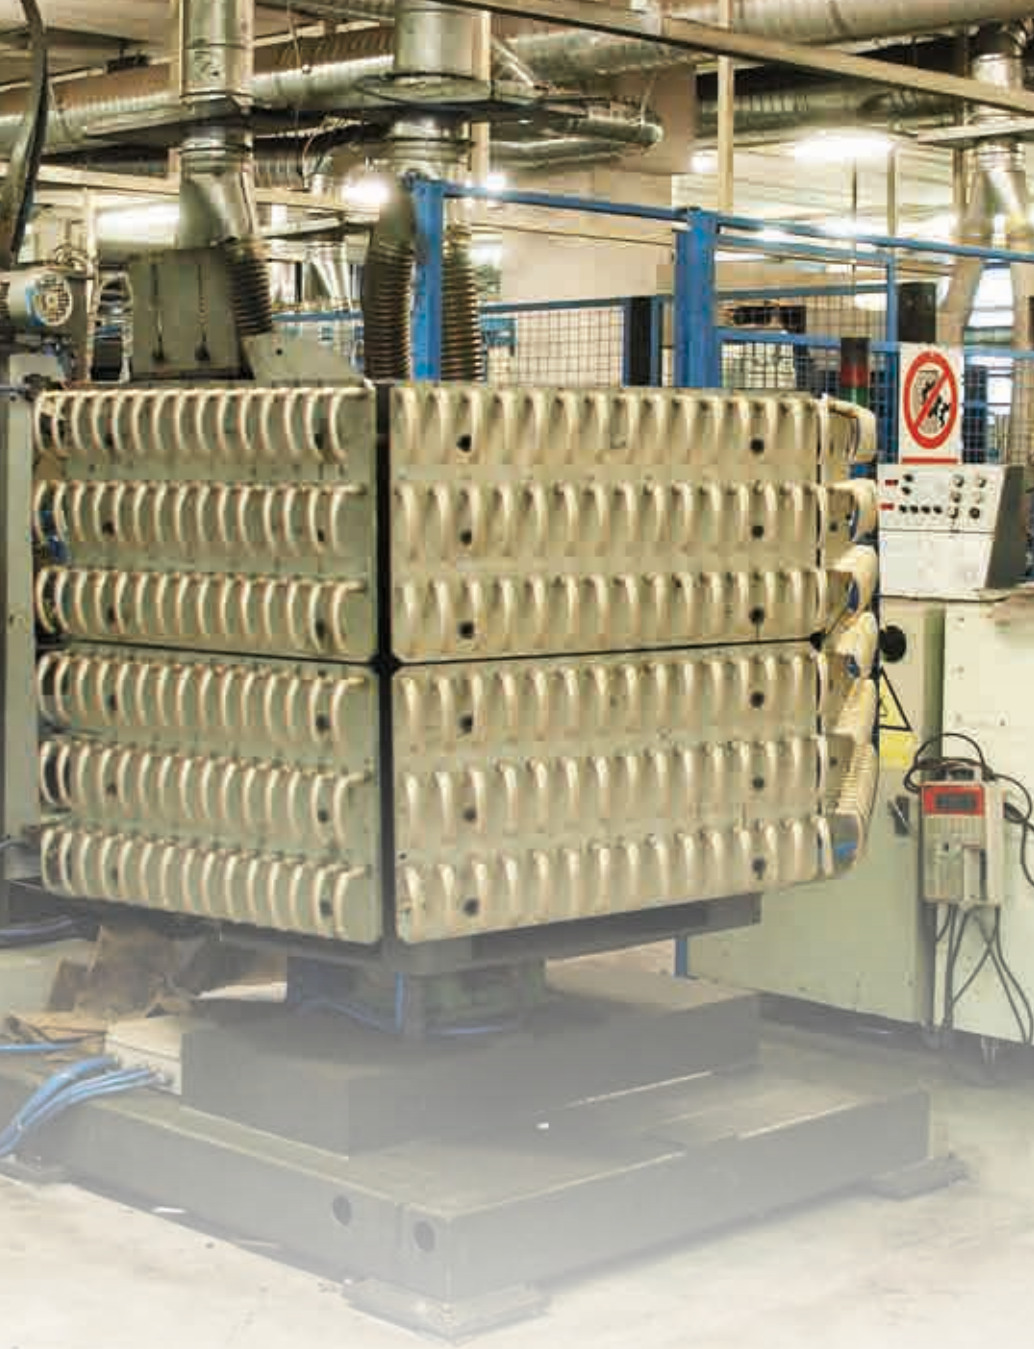

Sculpted in the trunk of an old and large elm planted in the courtyard of a country home, Frosio Bortolo, the *"spasuli"*, continues to polish so everlasting handles as they did in the mid-twentieth century in Val Sabbia. Gianluigi Zambelli, sculptor of international fame, to represent the father of his childhood friend Pietro, sectioned the majestic tree. Inside he found a piece of net and an iron hook which tied the oxen, objects absorbed into the passage of time and ringed in concentric circles that reveal the age of the elm. Realism and symbolism combine in the wooden figure honey-colored. The similarity between Bortolo and the statue, the face concentrated, the movement of skilled hands, the fold of work clothes, the twisted plot of the chair, the wallet sticking out of pocket, express a moving realism. The symbolism is obvious in the belt that instead of water, falling, moves the paddle wheel and pulley. It represents the energy that comes down from above on the man called to accomplish the eternal struggle to dominate and coexist with nature. The base of white chiselled stone, allows the statue to rotate on itself when the hands of his son Pietro, grandchildren Omar and Marco and workers touch it and seems to tell to Bortolo: "You're always here with us. You never went away. You welcome us every morning and every evening you great us when we get home, to our families, after working here in your company". As a solid elm able to withstand frost in shady woods of mountain valleys, the patriarch Bortolo has resisted at every bad-weather with roots anchored in his valley to protect the path of his sons and grandchildren in the world.

*Maniglie dallo spasulì ai robot,
un'esperienza industriale.*

UN'ECCELLENZA ITALIANA

Proprietaria del marchio *Forme* è la società Frosio Bortolo Srl, una realtà industriale che da oltre 60 anni, produce e commercializza articoli di maniglia. L'azienda è ancora oggi gestita dalla famiglia Frosio, con la stessa passione e dedizione al lavoro che ne caratterizzarono i natali oltre 60 anni fa ad opera del capostipite Bortolo. Oggi la Frosio Bortolo Srl può vantare la proprietà di diversi marchi, di cui cura direttamente la produzione e la vendita in tutto il mondo. La realizzazione dei prodotti, avviene presso moderni stabilimenti industriali siti nel comune di Preseglie, in Valle Sabbia, una delle zone industrialmente più dinamiche dell'intera provincia bresciana.

AN ITALIAN EXCELLENCE

Owner of the "Forme" trademark is Frosio Bortolo Srl, an industrial reality that since over 60 years, manufactures and markets articles for handles. The Company is still managed by the Family Frosio, with the same passion and dedication to the job that characterized the birth over 60 years ago by the founder Bortolo. Today Frosio Bortolo Srl can boast the properties of different brands, looking after personally the production and sales in all over the world. The realization of the products takes place in modern industrial establishments in the city of Preseglie, in Valle Sabbia, one of the most dynamic industrially area of the whole province of Brescia.

PRODUZIONE
100% MADE IN ITALY

Ecotech[®]
Environmentally
friendly technology.

ECOTECH® - TECNOLOGIA AMICA DELL'AMBIENTE

La Frosio Bortolo è stata da sempre consapevole dell'importante ruolo che ricopre, in un'azienda moderna e orientata al prodotto, l'aspetto tecnologico e qualitativo. Da alcuni anni ci stiamo impegnando affinché questi miglioramenti oltre a tradursi in prodotti di sempre maggiore qualità siano anche il più possibile rispettosi dell'ambiente.

Questo equilibrio lo abbiamo trovato grazie all'innovativo processo tecnologico di rivestimento dei metalli ECOTECH®.

Questa nuova tecnologia conferisce ai prodotti lavorati notevoli e variegate caratteristiche, che non si trovano in alcun modo nei prodotti sottoposti ai tradizionali processi di rivestimento dei metalli. Tra gli elementi di maggior interesse:

- **tecnologia più pulita** di qualsiasi altra tecnica di rivestimento
- **alta resistenza all'abrasione**
- **alta resistenza chimica**
- **rivestimento uniforme**
- **indistruttibile legame tra il film ed il substrato** (saldati insieme a livello molecolare)
- possibilità di ottenere **colori innovativi**

Il rivestimento con tecnologia ECOTECH® viene da noi impiegato sia per prodotti d'ottone sia per quelli di zama. Come già detto, esso offre una grande versatilità rispetto ai tradizionali processi di rivestimento, in quanto può essere usato per depositare materiali conduttivi o isolanti su ogni tipo di substrato avendo al tempo stesso un minor impatto ambientale.

ECOTECH® - ENVIRONMENTALLY FRIENDLY TECHNOLOGY

The Frosio Bortolo has always been aware of the important role it plays, in a modern Company and product-oriented, the technological and qualitative aspect.

Since several years we have been working hard to ensure that these improvements as well as become products of greater quality, they are also more environmentally friendly as possible.

We found this equilibrium thanks to an innovative technological process of metals coating ECOTECH®. This new technology gives to the manufactured products considerable and varied features, which are not in any way in the products subjected to conventional metals coating processes. Among the elements of greatest interest:

- **cleaner technology** respect to every other coating technique.
- **high abrasion** resistance
- **high chemical** resistance
- **uniform coating**
- **unbreakable bond between the film and the substrate** (welded together at molecular level)
- possibility of **obtaining new colors**.

The coating technology ECOTECH® is used by us both for brass products and those ones in zamak. As already said, it offers great versatility compared to conventional coating processes, as it can be used to deposit conductive or insulating materials on any type of substrate, having at the same time a lower environmental impact.

BREVETTO

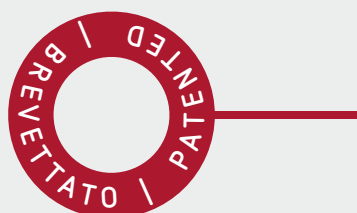

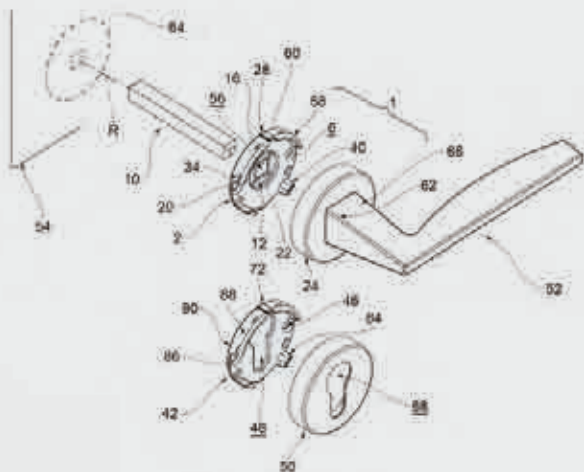

SISTEMA FIXA

Completamente in metallo e privo di parti in plastica, il nostro nuovo meccanismo di montaggio delle rosette, garantisce:

- tempi d'installazione più rapidi.
- maggiore precisione nel posizionamento.
- maggior tenuta nel tempo.

Tutto questo grazie a particolari accorgimenti meccanici, quali:

- il bloccaggio a pressione, che rende rapido e veloce lo svolgimento del lavoro.
- il sistema auto-centrante del quadro, che garantisce il corretto posizionamento della rosetta in fase di montaggio.
- la presenza di scanalature guida, che assicurano la stabilità e l'immovibilità della rosetta una volta installata.

PATENT

FIXA SYSTEM

Completely made of metal and without plastic elements, our new fitting mechanism of roses guarantees:

- faster installation time
- greater precision in positioning
- greater hold and longterm resistance

All of this thanks to mechanical measures as:

- the pressure locking system, which makes working operations faster
- the hub self-centering system, that guarantees the proper rose positioning while installing.
- the guide grooves, that ensure the stability and the immovability of the rose after the installation.
